Our LOW NUMBERS reflect our HIGH QUALITY of care

When you're discharged from the hospital to a skilled nursing setting following surgery or illness, you want to get better and back home as quickly as possible. A trip back to the hospital is definitely not part of anyone's plan.

We focus on fostering your recovery, and have numerous measures in place to keep our residents **out of the hospital.**

At 8.3%

our Rate of Hospital Readmission is far below the national average of 16.6% and one of the lowest in the area!

To minimize the rehospitalization of our residents, we take the following steps:

- Implementation of 30-day protocols for CHF, COPD, pneumonia, heart attacks and total joint replacement
- Weekly rounds by our specialists / Nurse Practitioner on staff
- State-of-the art wound management and infection control
- Daily review of patient care plans to effectively manage comorbidities – treating the entire patient, not just one condition
- Diagnostics done on-site to detect and identify early warning signs so treatment can begin immediately
- Effective communication with all healthcare partners, from initial acute care setting through post-discharge home
- · Patient and family education
